

UNIVERSAL TOXICOLOGIC RESPONSE

- Provide for safety of responding personnel, patients and bystanders
- Initiate care of the exposed, remove from source, decontaminate, initiate immediate supportive care
- Determine product or agent involved
- Document findings and contact the Poison Center
- Document recommendations from the Poison Center
- Initiate immediate life saving therapy based upon Poison Center's recommendations
- Contact Medical Direction at the receiving facility as soon as possible
- Advise of the Poison Center recommendations and treatment rendered
- Document Medical Direction orders
- As new information is obtained update:
 - Poison Center
 - Medical Direction
 - Receiving hospitals (if multiple)

Poison Center contact: 520-626-6016 (Poison Control is NOT MEDICAL CONTROL, confirm use of Posion Control advice with Medical Control)
